

VINICIUS GONZALEZ CAETANO

Senior Software Engineer

Ottawa, ON | vinigonzalez1993@gmail.com | +1 343-555-3248

SUMMARY

Senior Software Engineer with 8+ years of experience designing, building, and operating production backend and full-stack systems in Python, Django, Node.js, NestJS, React, and TypeScript. Skilled in REST API design, PostgreSQL, AWS, Terraform, CI/CD, and asynchronous messaging with RabbitMQ. Owns technical initiatives end to end, from architecture and testing to deployment and production operations, with a proven record delivering reliable systems and integrations in regulated, data-driven environments.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: Django, Django REST Framework, Node.js, NestJS, REST APIs, Microsoft Graph API, Single Sign-On (SSO), ETL

Frontend: React, TypeScript, D3.js

Cloud & Infrastructure: AWS (S3, CloudFront), Terraform, Infrastructure as Code

Data: PostgreSQL, Relational Databases, pandas, Data Pipelines

Distributed Systems: RabbitMQ, Asynchronous Processing, Message Queues, System Integration

DevOps & Quality: GitHub Actions, CI/CD, Git, Test-Driven Development (TDD), Selenium

PROFESSIONAL EXPERIENCE

GeneRxN

Senior Software Engineer | Ottawa, ON | September 2026 – Present

- Own backend architecture and development of Python and Django REST Framework services, from API design and data modeling through deployment and production support, using Test-Driven Development (TDD).
- Build backend services with Node.js and NestJS and deliver full-stack features with React and TypeScript, backed by well-tested REST APIs.
- Implement secure authentication and system integrations, and process and ingest data from multiple sources.
- Build asynchronous processing and inter-service messaging with RabbitMQ to decouple long-running workloads and improve reliability.
- Maintain PostgreSQL data models, migrations, and query performance as product, operational, and reporting needs evolve.
- Manage AWS infrastructure as code with Terraform and maintain GitHub Actions CI/CD pipelines for automated testing and multi-environment deployment.
- Develop Python and pandas ETL pipelines for structured-data processing, analytics, and reporting.

Ottawa Memory Clinic

Senior Software Engineer | Ottawa, ON | May 2023 – August 2026

- Led backend architecture of a Django REST Framework platform supporting clinical workflows, authentication, document processing, and data ingestion, using Test-Driven Development (TDD).
- Designed and implemented enterprise Single Sign-On (SSO) with Microsoft Graph API, integrating identity and access management into application workflows.
- Built Python and Node.js services and React/TypeScript features on REST APIs; introduced RabbitMQ asynchronous processing to decouple long-running workloads and improve reliability.
- Introduced Terraform infrastructure as code for AWS and built GitHub Actions CI/CD pipelines, improving deployment consistency across environments and reducing manual configuration.
- Owned PostgreSQL models, migrations, and query optimization, and built pandas ETL pipelines for analytics and reporting.

Arbache Innovations

Software Engineer | Vitória, ES, Brazil | January 2019 – April 2023

- Developed backend services with Django REST Framework and React frontends across a multi-application environment, applying TDD to improve test coverage and release confidence.
- Designed interactive D3.js data-visualization dashboards for business reporting and analytics.
- Implemented data synchronization and integration workflows across multiple systems; managed PostgreSQL databases across environments.
- Led frontend deployment pipelines on AWS S3 and CloudFront, automated with GitHub Actions.

EDUCATION

Post-Graduate Certificate, Business Intelligence System Infrastructure – Algonquin College, Ottawa, ON – August 2023

Coursework: Data ETL with Python and SQL, relational databases, Power BI, Tableau, machine learning, exploratory data analysis, database development.

Bachelor of Mechanical Engineering – FAESA, Vitória, ES, Brazil – 2017
