

VINICIUS GONZALEZ CAETANO

Senior Software Engineer

Ottawa, ON • vinigonalez1993@gmail.com • +1 343-555-3248

SUMMARY

Senior Software Engineer with 8+ years of experience designing, building, and operating production-grade backend and full-stack systems. Strong hands-on expertise in Python, Django, Node.js, React, TypeScript, PostgreSQL, AWS, Terraform, CI/CD, and asynchronous systems. Experienced in owning technical initiatives end-to-end, from architecture and API design through infrastructure, testing, deployment, and production operations. Strong track record delivering reliable systems and integrations in regulated, data-driven environments.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: Django, Django REST Framework, Node.js, REST APIs, ETL

Frontend: React, D3.js

Cloud & Infrastructure: AWS, Terraform, S3, CloudFront, Infrastructure as Code

Data: PostgreSQL, Relational Databases, pandas

Distributed Systems: RabbitMQ, Asynchronous Processing, System Integration

DevOps & Quality: GitHub Actions, CI/CD, TDD, Selenium

PROFESSIONAL EXPERIENCE

Ottawa Memory Clinic | *Software Engineer* | *Ottawa, ON*

05/2023 – Present

- Lead backend architecture and development of a Django REST platform supporting clinical workflows, authentication, document processing, and data ingestion, using Test-Driven Development (TDD).
- Designed and implemented secure enterprise Single Sign-On (SSO) with Microsoft Graph API, integrating identity and access management into application workflows.
- Build backend services with Python and Node.js and deliver full-stack features with React and TypeScript backed by REST APIs.
- Implemented asynchronous processing and inter-service messaging with RabbitMQ to decouple long-running workloads and improve system reliability.
- Own PostgreSQL data models, migrations, and query optimization for evolving product, operational, and reporting requirements.
- Introduced Terraform-based infrastructure as code for AWS resources, improving deployment consistency and reducing manual configuration.
- Designed and maintained GitHub Actions CI/CD pipelines covering automated testing, validation, and multi-environment deployment.
- Built and maintained Python ETL pipelines using pandas for structured-data processing, analytics, and reporting.

Arbache Innovations | *Software Engineer* | *Vitória, ES, Brazil*

01/2019 – 04/2023

- Developed and maintained backend services with Django REST Framework and frontend applications with React in a multi-application environment.
- Designed interactive D3.js data-visualization dashboards supporting business reporting and analytics.
- Implemented data synchronization and integration workflows across multiple systems.
- Led frontend deployment pipelines using AWS S3 and CloudFront, automated through GitHub Actions.
- Applied TDD practices to backend services to improve test coverage, maintainability, and release confidence.
- Managed PostgreSQL databases across multiple environments and applications.

EDUCATION

Algonquin College | *Post-Graduate Certificate – Business Intelligence System Infrastructure* | *Ottawa, ON*

08/2023 Data ETL with Python and SQL, relational databases, Power BI, Tableau, machine learning, exploratory data analysis, and database development.

FAESA | *Bachelor of Mechanical Engineering* | *Vitória, ES, Brazil*

02/2017
